DETAILED ACTION

1. This communication is responsive to Amendment dated 7/29/2005.
2. Claims 2-3 are cancelled; claims 13-19 are newly added. Currently, claims 1 and 4-19 are pending for the examination, wherein claims 6-12 are withdrawn.
3. Claims 1, 4, 5 and 13-19 contain embodiments directed to following patentably distinct species of the claims invention:
 - a. One embodiment drawn to a reflector comprising an embossed layer having a reflective surface having a plurality of recesses; an embossed base disposed on a surface of the embossed layer opposing the reflective surface, wherein an inner surface of each recess includes two spherical surfaces having different radii, wherein a reflectance is maximized at a reflection angle smaller than a reflection angle in a regular reflection direction, [figs. 4A, 4B, 5; claims 1, 4, 5, 13-15, 18, 19].
 - b. Another embodiment drawn to a reflector comprising an embossed layer having a reflective surface having a plurality of recesses; an embossed base disposed on a surface of the embossed layer opposing the reflective surface, wherein the inclination angles of inner surfaces are set in the range of -18 degrees to $+18$ degrees, wherein the recesses have a substantially constant reflectance in an acceptance angle range of ± 10 degrees around a regular reflection direction as a center to provide symmetrical distribution of reflection characteristics around the regular reflection direction, [figs. 6-7; claims 1, 4, 5, 13, 14, 16, 17].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that claims 1, 4, 5, 13 & 14 are generic.

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent from or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
